

Sand Brick Instructions

1

Fill the bag 1/2 way with sand.

Fill to Here

Detailed description: This panel shows the first step of the process. On the left, a person is shown from the side, filling a large, light-colored bag with sand using a shovel. On the right, a diagram of the same bag is shown lying flat on the ground, partially filled with sand. An arrow points to the top edge of the sand, with the text 'Fill to Here' next to it.

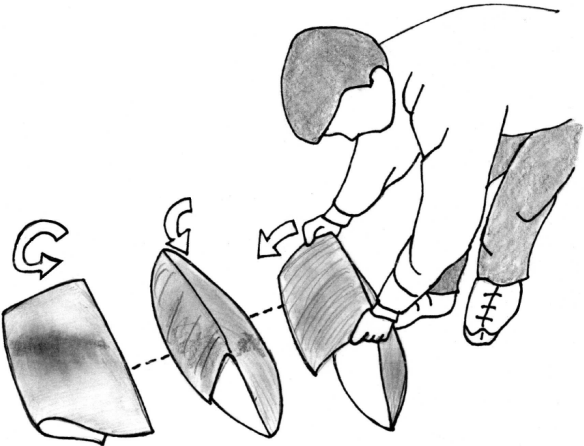

2

Slap the bag over your foot.
This packs sand into the corners.

Detailed description: This panel shows the second step. A person is shown from the side, slapping the top of a sand bag over their right foot. Arrows indicate the direction of the slap, showing the bag being pressed down and outwards to pack the sand into the corners.

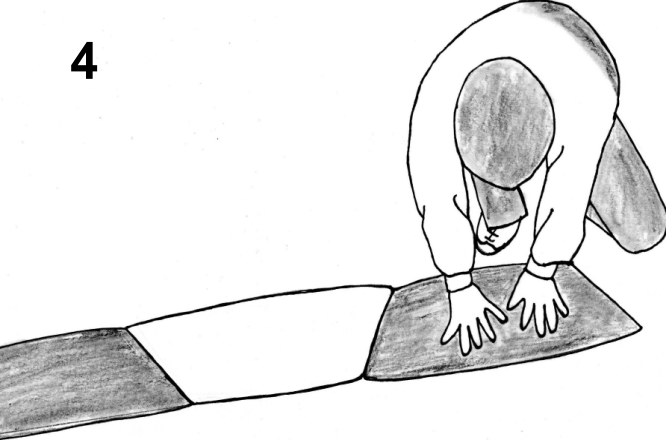

3

Fold the neck of the bag under and place on the wall in one motion.

Detailed description: This panel shows the third step. A person is shown from the side, folding the neck of a sand bag under and placing it against a vertical wall. Arrows indicate the motion of the bag being thrown against the wall.

4

Lay in alternating color rows.
Press the angles together hard.

Detailed description: This panel shows the fourth step. A person is shown from the side, laying sand bricks on a flat surface. The bricks are laid in alternating rows of light and dark colors. The person is pressing the corners of the bricks together to form a solid structure.
